Investment Objective

The Fund aims to provide long-term capital appreciation through a concentrated portfolio of U.S. equities. The investment team carefully selects approximately 20 companies from a universe of large steadily-growing businesses with high-quality recurring earnings, a sound management strategy, and robust financials. Its goal is to double the Fund's capital on average every five years.

The Fund is focused on businesses with the highest earnings forecast conviction five years out. Market out-performance is driven by a concentrated approach and allocating capital to maintain long-term double-digit annual earnings growth by the overall portfolio. Value can be preserved on the downside with emphasis on quality and predictability.

The Fund's portfolio is similar to the Flagship portfolio under SMA mandates and its performance (since Oct. 2014) is available at www.stewartassetmgmt.com/performance.
